NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. When built, the facility will be able to hold up to 100 megawatts (MW) and power over tens of thousands of households. Once.

Battery energy storage is critical to improving grid reliability, harnessing the full power of renewable energy, reducing New York's reliance on fossil fuels, and transitioning to a modernized electric grid. It is critical to plan for the future, today. Battery energy storage will be increasingly.

Described as a list of the year's most innovative and recommended solar solutions, the NV-14 was among eight total products that achieved this ranking in the competitive "Residential Energy Storage Systems" category. NeoVolta's NV-14 was highlighted for the way its "ESS integrates AC, DC, and both.

Battery energy storage has become a core component of utility planning, grid reliability, and renewable energy integration. Following a record year in 2024, when more than 10 gigawatts of utility-scale battery storage were installed nationwide, deployment accelerated even further in 2025. By.
