

After-sales service for 60kW folding container used in schools

Overview

Why do schools need storage containers?

When schools need more space for new construction, expansion or other needs, storage containers and modular buildings provide additional storage and workspace for students and staff. Our secure shipping containers are ideal for storing seasonal equipment and maintenance supplies.

Can shipping containers be used as a classroom building?

When educational institutions need additional square footage, they can convert shipping containers into modular classroom buildings. These structures are an innovative, low-cost, and portable convenient solution for schools to expand when they most need it.

How long do shipping container schools last?

When shipping container schools are erected, it's reasonable to anticipate they'll be in use for at least a few months, if not years, and any long-term structure that will be occupied on a regular basis necessitates a foundation able to support the weight of the construction.

How much does a shipping container classroom cost?

Typically, shipping container structures will cost less than half the price per square foot of traditional construction. It will cost approximately \$150,000 to construct a shipping container classroom with the same area as a 2,000-square-foot traditional classroom.
