

Arc flash switchgear for sale in Jamaica

Overview

What is arc resistant switchgear?

Arc resistant refers to the equipment rating achieved by meeting the ANSI C37.20.7 Standard for arc resistant switchgear. ArcBlok is a Schneider Electric patented technology applied inside of PZ-4 switchgear which is designed to rapidly quench and transfer an internal arcing fault before it propagates inside the circuit breaker compartment.

What is an arc flash?

An Arc Flash is a through-air short circuit event that occurs as a result of a fault condition in an electrical distribution system. Arc resistant refers to the equipment rating achieved by meeting the ANSI C37.20.7 Standard for arc resistant switchgear.

What is arc-resistant switchgear?

Because arc-resistant switchgear is specifically designed to contain and limit the damage incurred from internal arc faults, it provides the highest degree of protection to personnel, long-term savings, and a significant reduction in downtime.

What is the minimum clearance for arc resistant switchgear?

To maintain the Arc Resistant rating, the switchgear requires a minimum clearance of 3 inches from the front, rear or sides to the nearest wall or obstruction (see note below for Code required aiseways for equipment). Equipment directly coupled to the switchgear is allowed.

Arc flash switchgear for sale in Jamaica

[Siemens #GM-SG, switchgear 15 kV 1200 amp with arc flash ...](#)

Find many great new & used electrical & power equipment deals and get the best price for Siemens #GM-SG, switchgear 15 kV 1200 amp with arc flash detection at Surplus Record. ...

Power-Zone 4 Arc Resistant

Browse our products and documents for Power-Zone 4 Arc Resistant - Low voltage metal-enclosed, drawout switchgear designed to contain the effects of arc flash events inside the ...
