

Battery connection label for solar container communication station

Overview

The diagrams on the following pages illustrate the connection of batteries to the StorEdge system. The following table will help you find the appropriate wiring diagram for your system configuration.

The diagrams on the following pages illustrate the connection of batteries to the StorEdge system. The following table will help you find the appropriate wiring diagram for your system configuration.

For proper battery performance, the LG Chem battery should remain connected to the StorEdge Inverter and in charging mode. Extended battery disconnection may result in deep discharge and damage the battery. If the battery must be disconnected, first turn OFF the LG battery auxiliary power supply.

This document contains a battery wiring guide and on site checklist with steps for post-installation verification of a StorEdge system. For more details, please refer to the StorEdge Installation Guide supplied with the StorEdge Inverter or StorEdge Interface. For additional assistance contact.
