

# Belmopan Green New Energy solar Site

## Overview

---

A \$950 million solar farm project started construction and will become New York's largest solar energy facility when completed in late 2026. The project will combine solar energy production with agricultural use, supporting sheep grazing on over 300 acres.

The New York State Energy Research and Development Authority (NYSERDA) today announced that CleanCapital was selected to build one of the largest solar projects in the Adirondack Park under New York's first Build-Ready site auction to advance large-scale renewable energy across the State. The.

Belmopan, Cayo District, Belize, located at 17.2501°N, -88.7676°W, offers a promising environment for solar energy generation throughout the year. This tropical location experiences consistent sunlight, with seasons primarily characterized by wet and dry periods rather than significant temperature.

The project is scheduled to debut in 2026. Solar energy in New York got a big boost with the announcement of a \$950 million contract to construct the state's largest solar farm, and the program has now broken ground, according to PV Magazine. Greenbacker Renewable Energy secured the deal to build.
