Protect sensitive electronics and equipment during power surges and blackouts with a UPS System or Uninterruptible Power Supply from our extensive UPS lineup of standby, line-interactive, and double-conversion models. Battery backup capacities range from 350 VA to 50,000 VA. Key features include.

Power protection and management solutions from home to data center to industrial environments. 3 Phase UPS power protection, solving today's energy challenges while setting the standard for quality and innovation with fully integrated solutions for enterprise-wide networks, data centers.

APC Back-UPS Pro Compact provide backup battery power during power outages and continuously safeguard devices from fluctuating power conditions and surges. This compact tower UPS is designed for workstations, monitors and network devices. Automatic Voltage Regulation (AVR) instantly corrects.

An uninterruptable power supply (UPS) is a type of backup battery that will continue to provide electrical power to the electronics that you have plugged into it even if electricity from your home outlets cuts out. Unlike a backup generator, it does not need to power up in order to start generating.

Protect important devices from damaging surges, spikes and power outages with the APC 8-Outlet Uninterruptible Power Supply. This unit allows you to power your wireless home networking equipment and maintain your internet connection up to 3.5 hours after safely shutting down your PC or high-powered.
