

Bolivia large cylindrical solar container lithium battery module

Overview

Will Bolivia build a lithium battery plant in China?

La Paz (AFP) – Bolivia said Tuesday it had signed a \$1 billion deal with China's CBC, a subsidiary of the world's largest lithium battery producer CATL, to build two lithium carbonate production plants in the country's southwest.

Where is the largest lithium-ion battery storage system in Bolivia?

The site in the municipality of Baures, Bolivia. Image: Cegasa. The largest lithium-ion battery storage system in Bolivia is nearing completion at a co-located solar PV site, with project partners including Jinko, SMA and battery storage provider Cegasa.

Where are Bolivia's lithium plants located?

Bolivia's state-owned Bolivia Lithium Deposits (YLB) said the plants -- one with an annual capacity of 10,000 tons of lithium carbonate and the other of 25,000 - would be situated in the vast Uyuni salt flats. Lithium, nicknamed "white gold," is a key component in the production of batteries for electric vehicles and mobile phones.

Will Bolivia control YLB lithium plants?

Alarcon dismissed those criticisms as politically motivated or misinformed. Bolivia will control the lithium sales and hold a majority stake in the ventures, he said, adding that YLB won't begin to repay the investments until plants are running at full tilt, ensuring minimal financial risk for the state.
