

Bosnia and Herzegovina Government Energy Storage Project

Overview

This project aims to implement a battery energy storage system (BESS) for EPBIH, aimed at enhancing the decarbonisation of the energy sector in Bosnia and Herzegovina.

This project aims to implement a battery energy storage system (BESS) for EPBIH, aimed at enhancing the decarbonisation of the energy sector in Bosnia and Herzegovina.

This project aims to implement a battery energy storage system (BESS) for EPBIH, aimed at enhancing the decarbonisation of the energy sector in Bosnia and Herzegovina. The BESS will be designed to integrate additional intermittent renewable energy sources, such as wind and solar power, thereby.

The Framework Energy Strategy provides the context and direction of energy development for Bosnia and Herzegovina, striving towards a true balance in the context of “energy trilemma”. Initiation of right investments, market and regulatory reforms in all energy segments, supported by sound and.

Bosnia and Herzegovina is set to have its first battery energy storage systems installed in the transmission network, which will provide auxiliary services. The State Electricity Regulatory Commission is drafting a decision to allow battery energy storage systems (BESS) to offer secondary frequency.

The country needs to harvest its significant renewables potential to avoid the risk of turning into a net electricity importer and missing its climate objective, new report says. Sarajevo, Bosnia and Herzegovina, 25 September 2023 – Despite being a net electricity exporter, Bosnia and Herzegovina.

Bosnia and Herzegovina is a self-sufficient, net exporter of electricity. However, its energy sector relies mostly on fossil fuels, in addition to hydro and a negligible level of renewables. Bosnia and Herzegovina is well endowed with renewable energy resource potential; however, the sector is.

The CSSC LAB project is being funded within the third call of the INTERREG DANUBE TRANSNATIONAL Programme of the European Commission, under the specific objective SO 3.2: Improve energy security and energy efficiency. It aims to

contribute to the energy security and energy efficiency of the region.
