

China all in one solar system in South-Africa

Overview

A 100MW solar power project is under development in South Africa's Limpopo Province, spearheaded by CGN Africa Energy, the China-Africa Development Fund, and Samancor Chrome, one of the region's largest minerals-processing companies.

A 100MW solar power project is under development in South Africa's Limpopo Province, spearheaded by CGN Africa Energy, the China-Africa Development Fund, and Samancor Chrome, one of the region's largest minerals-processing companies.

POWERCHINA signed an EPC contract with South Africa's SolarAfrica Energy for the De Aar Central Solar Power Plant on Sept 23. The ceremony was attended by David McDonald, CEO of SolarAfrica Energy; Liu Kai, Deputy General Manager of the Company and General Manager of its Southeast Africa regional.

But underneath all the hype and hope, there are a few stories about transformational changes that are important to entire nations or even entire continents. One of them involves Africa, where more than 600 million people have no access to reliable electricity. That puts them about a century behind.

Chinese solar equipment has been flooding African markets, partly as a ripple effect of the US-China trade war. It's one of several factors helping the continent gain traction with electrification. Solar power is widely recognized as an excellent solution for Africa. Sunlight is abundant, economies.

A 100MW solar power project is under development in South Africa's Limpopo Province, spearheaded by CGN Africa Energy, the China-Africa Development Fund, and Samancor Chrome, one of the region's largest minerals-processing companies. The project, designed to provide renewable energy to Samancor.
