

# Construction of a new energy storage power station in Lisbon

## Overview

---

Endesa Generación Portugal, part of Enel Group, has been awarded the connection rights to develop a renewable energy project combining solar, wind, green hydrogen and a 168.6MW battery energy storage system (BESS) to replace the country's last coal power station.

Endesa Generación Portugal, part of Enel Group, has been awarded the connection rights to develop a renewable energy project combining solar, wind, green hydrogen and a 168.6MW battery energy storage system (BESS) to replace the country's last coal power station.

Lisbon's iconic yellow trams zipping through streets powered entirely by stored solar energy. While we're not quite there yet, the Lisbon Energy Storage Project Bidding process for 2025 could make this vision a reality. As Europe's first major urban battery storage initiative of its scale, it's.

Galp has kicked off construction on five new battery energy storage system (BESS) projects in Spain and Portugal, marking a major step in its clean energy strategy. According to the company, the installations will total 74MW/147MWh and connect directly to solar power plants. Four of the projects.

The European Green Deal launched in 2019 established the roadmap for reducing emissions in the EU by at least 55%. To align with these objectives, Portugal developed the National Energy and Climate Plan 2030 (Plano Nacional de Energia e Clima - "PNEC 2030"), which is the main national policy.

That's the vision behind Lisbon's groundbreaking energy storage plant, now operational and setting benchmarks for renewable integration. This facility isn't just about storing power—it's about redefining how cities balance energy demand, reduce carbon footprints, and future-proof their grids.

y storage & grid flexibility?

The Portuguese Ministry of Energy has allocated a?

!99.75 million (\$107.6 million) for grid flexibility and energy storage projects which should be installed by the end of 2025. From ESS News Portugal is seeking to

promote flexibility and balance its power system with.

The proposed project will combine wind, solar, battery energy storage and green hydrogen to help local industry decarbonise. It includes an option to expand the connection to 1,200MW. [pdf] The global industrial and commercial energy storage market is experiencing explosive growth, with demand.

## Construction of a new energy storage power station in Lisbon

### LISBON ENERGY STORAGE STATION

system be built in Portugal? Galp, a Portuguese energy company, has announced plans to build a 5 MW/20 MWh battery storage system in Portugal in collaboration with Powin. The system at ...
