

# Container 500 kW generator

## Overview

---

How much power does A 500KW diesel generator have?

The 500kW diesel generator is available in SD (single unit) and MD (modular/paralleling) models. There are several standard, configured, and engineered options. It has a 6 cylinder engine and is available in a three-phase system. It has the power of 601-1735 amps. Open, standard, and level 1 or 2 enclosures are available options.

What is a containerized diesel generator?

Discover the containerized diesel generators at DINGBO Power, offering a mobile and secure power solution for a wide range of applications. These generators are housed in robust containers, providing enhanced security and portability. Ideal for use in remote, outdoor, or temporary sites, they ensure reliable power delivery in any setting.

What equipment do you need for a container power station?

Our generators can be equipped with explosion-proof switches, lights, and cabinets, along with workbenches and rope hooks. Optional sleds or climbing plows are available to meet the unique operational demands of container power stations in oilfield settings.

Are containerized generators reliable?

Years of use in the rental, oil and gas, mining and other heavy-duty industries have tested the reliability, usability and durability of our containerized generators. Our primary design challenges in developing this line of containerized generators were usability, reliability and functionality for the end user.
