Compact AC and DC-input DIN-rail units providing adjustable 24VDC outputs and status signals. Line-interactive UPSs with rechargeable batteries that maintain uninterrupted power to critical loads via multiple output sockets during mains failures; they also protect from mains undervoltage and.

An uninterruptible power supply (UPS) is a type of backup battery that will continue to provide electrical power to the electronics that you have plugged into it even if electricity from your home outlets cuts out. Unlike a backup generator, it does not need to power up in order to start generating.

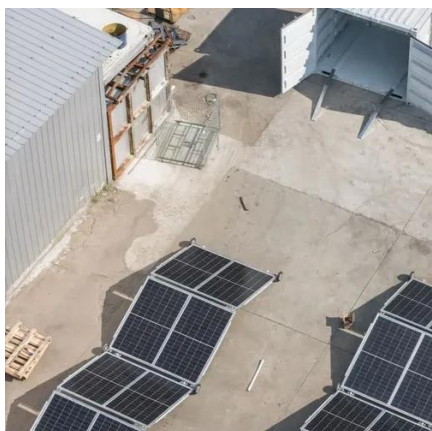

Uninterruptible Power Supplies obtain their power from batteries to provide backup power to deliver it to computers and other critical equipment and use AC power to charge their batteries and power equipment when it is available. How to select an Uninterruptible Power Supply. Consider the.
