Container shipping time, often called sea freight transit time, refers to the number of days it takes for a shipping container to move from the port of origin to the destination port. It's important to note that this is not the same as total delivery time. Many importers assume transit time equals.

Since many ocean liners carry more than 10,000 containers, even the simple process of unloading the ship can take 1-3 business days. How long does it take to unload a 40 ft container?

Generally speaking, it takes three hours to pack a 20-foot container and closer to six hours to pack a 40-foot.

Calculate freight shipping time in seconds with this free air, ocean, and trucking

international transit time calculator. The Freightos shipping time calculator provides estimated shipping times for multi-modal global shipping along selected lanes. Instantly estimate FCL, LCL, air, sea, and. How long does it take to ship a container ship?

As a result, average delivery times are now approaching three years for Tanker vessels and 3.2 years for Container Ships. For LNG carriers, it is even longer, especially from China, where average delivery times are approaching 4.8 years. When shipyard capacity is constrained, the lead time for commissioning new vessels lengthens.

How long does it take to pack a container?

Generally speaking, it takes three hours to pack a 20-foot container and closer to six hours to pack a 40-foot container. Why is transit time important?

Transit time includes the lead time, which makes it crucial. Lead time in business refers to the time needed to fulfill a supplier's purchase order.

How long does it take to ship a container from China?

This is because the typical route for container shipping from China to Europe is long — and goes through the South China Sea, Indian Ocean, Malacca Strait, and Suez Canal until it reaches its destination. Ocean freight transit times from China to the UK typically take between 35 and 45 days.

How long does it take for a ship to be delivered?

China now averages around 3 years in delivery time, with Tankers at 2.8 years, and LNG vessels even higher. Capesize Dry Bulk carriers ordered in 2024 are currently expected to be delivered in 3.6 years on average. South Korea, another major shipbuilder, stands at around 3 years, as well, though it has managed a slight reduction from 2023.
