Nationwide Power is a specialized uninterruptible power supply company that offers an extensive selection of UPS equipment to meet your specific needs and budget. We understand that power outages can disrupt business operations and lead to the loss of data and machines. Our UPS power solutions.

Compact AC and DC-input DIN-rail units providing adjustable 24VDC outputs and status signals. Line-interactive UPSs with rechargeable batteries that maintain uninterrupted power to critical loads via multiple output sockets during mains failures; they also protect from mains undervoltage and.

An Uninterruptible Power Supply (UPS) is designed to deliver backup power when you need it most. These devices, which are also sometimes referred to as a battery backup, take over in situations where the voltage drops or your regular power source fails. Situations such as rolling blackouts.

We will help you find the right solution. Uninterruptible Power Supplies obtain their power from batteries to provide backup power to deliver it to computers and other critical equipment and use AC power to charge their batteries and power equipment when it is available. How to select an.
