With utility rates rising at a rapid pace, going solar is a way to take control of your electricity costs and hedge against energy inflation. So, what's standing in the way of American homeowners and solar panels?

The biggest hurdle is often the perceived “upfront cost” of installing solar panels.

Solar panel costs range from \$16,600 to \$20,500 for the average 6.5 kW system, but prices can vary from as little as \$7,700 for smaller solar systems to upward of \$34,700 for larger systems. To find the most up-to-date solar panel costs in 2025, we compared research from the U.S. Department of

Switch to solar with a system built for you. Solar panels generate “free” electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in 2025. That price effectively drops to \$19,873 after.

Note: Data is expressed in constant 2024 US\$ per watt.

OurWorldinData.org/energy | CC BY IRENA presents solar photovoltaic module prices for a number of different technologies. Here we use the average yearly price for technologies 'Thin film a-Si/u-Si or Global Price Index (from Q4 2013)'. This.

Our estimator shows how many solar panels your home needs We generate an online cost and savings estimate You choose how many solar companies send you an exact price by email or text Click on your state for solar panels cost localized to your city or use the solar calculator above to see the live.

Solar panel costs refer to the price or expense associated with the acquisition and installation of solar photovoltaic (PV) systems and encompass a wide range of financial considerations. By definition, a solar panel, which converts sunlight into electricity using photovoltaic (PV) cells, is a.
