

# East Timor Civilian solar System

## Overview

---

The project was launched in 2023 and aims to turn INFPM into an example of energy sustainability by installing solar panels that will guarantee a continuous and stable supply of energy.

The project was launched in 2023 and aims to turn INFPM into an example of energy sustainability by installing solar panels that will guarantee a continuous and stable supply of energy.

On 24th September 2024, the Government of East Timor, in partnership with the United Nations Development Program (UNDP) and with financial support from the Government of Japan, launched the installation of a solar energy system at the National Institute of Pharmacy and Medical Products (INFPM).

Global law firm DLA Piper, as part of an advisory team led by the Asian Development Bank (ADB) has advised Eletricidade de Timor-Leste (EDTL) on a power purchase agreement with a consortium comprised of Électricité de France and Itochu for the development of Timor-Leste's first utility-scale solar.

Timor-Leste holds a strategic advantage over its neighbours in transitioning to solar rooftops, with potential electricity cost reductions and a recovery period of 2.5 years, lower than regional . Through the training, the young specialists in Timor-Leste gain an understanding of harnessing and.

On the path toward climate neutrality, the UN House in Calcoli, Dili, wanted a reliable, clean, and renewable energy source. In cooperation with our local partner, GSOL technicians have installed a 300kWp on-grid solar PV system, which covers 50% of the annual electricity consumption of the UN.

East Timor, officially known as Timor-Leste, is poised to make a significant leap in renewable energy with confirmed plans to construct a 200 MW solar power plant. This ambitious project, set to begin construction in 2026, will not only supply clean energy to neighboring Indonesia but also marks a.

Announced by the Timor-Leste government and funded by the Asian Development Bank (ADB), the project aims to broaden electricity access in underserved and remote areas by deploying solar power plants and distributing solar home systems.
