

Energy storage in the Buenos Aires power plant

Overview

Argentina has opened a \$500 million battery storage tender aimed at adding 500 MW of new energy storage capacity in the Buenos Aires metropolitan area. The AlmaGBA program, managed by CAMMESA, offers long-term contracts with fixed payments and financial guarantees to.

Argentina has opened a \$500 million battery storage tender aimed at adding 500 MW of new energy storage capacity in the Buenos Aires metropolitan area. The AlmaGBA program, managed by CAMMESA, offers long-term contracts with fixed payments and financial guarantees to.

Over 667 megawatts of energy storage capacity are headed for the Buenos Aires Metropolitan Area (AMBA), representing an investment exceeding half a billion US dollars. This isn't just about avoiding summer blackouts; it's a pivotal moment for Argentina's energy future, and a potential model for.

The international tender, first announced in February, aimed to secure 500 MW of energy storage capacity for critical points in the Buenos Aires Metropolitan Area (AMBA) grid. In a strong show of interest, 15 companies submitted 27 different project proposals. These represent a combined investment.

Argentina has taken a major step toward modernizing its energy infrastructure with the launch of a 500 MW battery energy storage system (BESS) tender under the AlmaGBA program. Aimed at enhancing grid reliability in the metropolitan area of Buenos Aires (AMBA), this \$500 million initiative marks.

The Ministry of Economy of Argentina has issued a national and international open call "GBA Storage -AlmaGBA", aimed at contracting 500 MW of electric energy storage plants in critical nodes in the Metropolitan Area of Buenos Aires. The total investment is estimated at US\$500m and the battery.

This week, the Argentinian government opened bids for the AlmaGBA tender, initiated in February 2025 to procure 500 MW of battery energy storage system (BESS) capacity for critical nodes in the Buenos Aires Metropolitan Area (AMBA) grid, enhancing reliability during peak demand. Fifteen companies.

The first large-scale battery energy storage tender in Argentina is catching the

attention of the international community as an unequivocal step towards modernizing power infrastructure. Intended to strengthen the grid in the greater Buenos Aires region, the program has attracted a lot of.
