

Estonia EK solar Panels

Overview

The European Investment Bank (EIB), together with local commercial banks SEB and Luminor, is lending the Estonian renewable energy company Sunly €62 million to build and operate a solar park in the country, accelerating the Baltic region's green transition and electricity independence.

The European Investment Bank (EIB), together with local commercial banks SEB and Luminor, is lending the Estonian renewable energy company Sunly €62 million to build and operate a solar park in the country, accelerating the Baltic region's green transition and electricity independence.

Today, Elpec Energy OÜ has designed and built more than 3 MW solar parks; in addition, we have built connection points for solar parks through tripartite agreements with Elektrilevi and the customer. We are one of the few companies in Estonia that can build solar parks with its team without using.

EIB lends €31 million to Estonian renewable-energy company Sunly for a new solar park in the country, while SEB and Luminor will jointly contribute the same amount. 244 MW solar park in Risti in western Estonia to be largest photovoltaic-production (PV) site in the Baltics. Project marks.

Estonia's renewable energy sector marked a major milestone in 2024, attracting €244 million in investments from the European Bank for Reconstruction and Development (EBRD). This funding is fueling key solar and wind power projects designed to accelerate the nation's green transition. A standout.

The largest solar farm in the Baltics has opened in Pärnu County, Estonia; the Kirikmäe Solar Farm, which covers 110 hectares and has a generating capacity of 77.53 megawatts, will provide enough electricity to power 35,000 homes each year.
