

Estonia lithium energy storage power supply sales

Overview

6W monitors the market across 60+ countries Globally, publishing an annual market outlook report that analyses trends, key drivers, Size, Volume, Revenue, opportunities, and market segments.

6W monitors the market across 60+ countries Globally, publishing an annual market outlook report that analyses trends, key drivers, Size, Volume, Revenue, opportunities, and market segments.

Market Forecast By Power Rating (Less than 3kW, 3 kW to 5 kW, Others), By Connectivity (On-Grid, Off-Grid) And Competitive Landscape How does 6W market outlook report help businesses in making decisions?

6W monitors the market across 60+ countries Globally, publishing an annual market outlook.

You've probably noticed the headlines: Battery energy storage system (BESS) prices in Tallinn have fallen 45% year-over-year, with recent projects hitting €0.11/Wh (\approx \$0.12/Wh). But what's driving this unprecedented price erosion?

Let's unpack the market forces reshaping Estonia's energy landscape.

State-owned utility and power generator Eesti Energia has completed and put into commercial operation the first large-scale BESS in Estonia. Eesti Energia officially inaugurated the 26.5MW/53.1MWh battery energy storage system last week (26 March), located at the Auvere industrial power plant.

Recent industry analysis reveals that lithium-ion battery storage systems now average €300-400 per kilowatt-hour installed, with projections indicating a further 40% cost reduction by . For utility operators and project developers, these economics reshape the fundamental calculations of grid.

Sunly, in collaboration with Metsagrupp, is developing a 16 MW / 32 MWh battery energy storage system (BESS) next to the 45 MW Raba Solar Park in Pärnu County, Estonia. The total project cost is US\$7.6 million. The project will be built without subsidies. Construction is set to begin this summer.

Estonia has laid the cornerstone for what will become the largest battery park in continental Europe, a major step toward synchronising the Baltic power grids with Europe by 2025; the project, led by Evecon, Corsica Sole and Mirova, aims to bolster energy security and support Estonia's transition.
