

European Energy Storage Projects

Overview

The Market Monitor is an interactive database that tracks over 3,000 energy storage projects. With information on assets in over 29 countries, it is the largest and most detailed archive of European storage.

The Market Monitor is an interactive database that tracks over 3,000 energy storage projects. With information on assets in over 29 countries, it is the largest and most detailed archive of European storage.

Energy storage helps to balance supply and demand. The European Energy Storage Inventory is the first of its kind at European level to show all forms of clean energy storage solutions. Unlike existing databases that focus on specific storage types, this platform surveys and maps a full range of.

The aim of the European Energy Storage Inventory is to record all European energy storage projects by status – in operation, planned and under construction –, by location and by technology. Most projects have been recorded in Germany so far. The dashboard can be filtered by country, project status.

A new interactive platform—the European Energy Storage Inventory —has been launched to provide near real-time insights into energy storage deployment across the EU, marking a major step toward a smarter and more sustainable energy system. Developed as part of the REPowerEU Plan, the platform is the.

There are 147 energy storage projects under construction in Europe, with a total capacity of 14 GW, according to the European Energy Storage Inventory, launched by the European Commission. The European Energy Storage Inventory comprises operational, under construction, permitted, and announced.

The European Energy Storage Inventory, developed by the Joint Research Centre (JRC) of the European Commission, is a new interactive platform that maps and analyzes over 1771 energy storage projects across Europe. This publicly accessible tool allows users to explore projects by technology type.

The European Commission officially introduced the “European Energy Storage Inventory” at the beginning of March 2025—a pioneering real-time dashboard, which for the first time enables a comprehensive and transparent overview of the

energy storage landscape in Europe. This innovative tool.

European Energy Storage Projects

Market Analyses

With information on assets in over 29 countries, it is the largest and most detailed archive of European storage. The database is accompanied by a report which outlines key EU ...

[The European Energy Storage Inventory: A comprehensive ...](#)

This innovative tool systematically catalogizes all energy storage projects within Europe, from the first planning phase to operational operation.

New tool maps Europe's real-time sustainable energy storage data

It offers near real-time data on the deployment of storage facilities across Europe, including an interactive dashboard and map, and identifies all the technologies, from battery ...

Europe Energy Briefs - Europe energy storage outlook , Enlit World

The report, now in its ninth edition, compiled by the European Association for Storage of Energy (EASE) and LCP Delta tracks over 3,000 energy storage projects from over ...

[EU launches real-time dashboard for energy ...](#)

The goal is to list all planned and operational energy storage projects in Europe by location and technology. The dashboard can be ...

[New EU Tool Tracks Real-Time Energy Storage Across Europe](#)

A new interactive platform--the European Energy Storage Inventory --has been launched to provide near real-time insights into energy storage deployment across the EU, ...

EU launches real-time dashboard for energy storage expansion

The goal is to list all planned and operational energy storage projects in Europe by location and technology. The dashboard can be filtered by country, project status and technology.

Energy Storage in Europe: Trends, Projects, and Outlook for 2025

Energy storage stands as a cornerstone of Europe's energy transition, facilitating the efficient use of renewable sources and bolstering grid stability. The increasing number of ...

[New tool maps Europe's real-time sustainable ...](#)

It offers near real-time data on the deployment of storage facilities across Europe, including an interactive dashboard and map, and ...

14 GW of energy storage capacity under construction in Europe

There are 147 energy storage projects under construction in Europe, with a total capacity of 14 GW, according to the European Energy Storage Inventory, launched by the ...

New EU Platform Highlights Over 1771 Energy Storage Projects

This publicly accessible tool allows users to explore projects by technology type, location, scale, and status-offering deep insights into how storage supports the EU's energy transition.

Europe accelerates renewable energy growth: 89 GW of energy storage

As Europe continues its transition to a more sustainable and resilient energy system, energy storage remains a critical enabler of renewable energy expansion. The report ...
