In aerospace systems, where weight, reliability, and responsiveness are critical, supercapacitors provide safe, instant energy for mission-critical performance. Built for rugged reliability, supercapacitors power advanced systems with fast, safe energy—even in the harshest environments and.

We offer a selection of electric double-layer capacitors (EDLCs), lithium ion capacitors, and miscellaneous types. A supercapacitor is a double-layer capacitor that has very high capacitance but low voltage limits. Supercapacitors store more energy than electrolytic capacitors and they are rated in.
