

Finnish battery storage production company

Overview

Construction of Finland's first cathode active material (CAM) plant will begin in April 2025 in Kotka. The facility, developed by Easpring Finland New Materials Oy, will supply materials for lithium-ion batteries used in electric vehicles and energy storage.

Construction of Finland's first cathode active material (CAM) plant will begin in April 2025 in Kotka. The facility, developed by Easpring Finland New Materials Oy, will supply materials for lithium-ion batteries used in electric vehicles and energy storage.

20.3.2025 | Finnish Minerals Group and Beijing Easpring Material Technology have decided to start the construction of the CAM plant. The plant to be constructed in Kotka, Finland will produce cathode active material, CAM, which is needed to produce lithium-ion batteries. The plant's first-stage.

Construction of Finland's first cathode active material (CAM) plant will begin in April 2025 in Kotka. The facility, developed by Easpring Finland New Materials Oy, will supply materials for lithium-ion batteries used in electric vehicles and energy storage. The project is a joint investment.

Ensto Building Systems specializes in electrification products and solutions, including electric vehicle charging, which is relevant to battery storage. With over 60 years of experience, the company emphasizes innovations in electrical manufacturing and sustainable technologies. Battery.

The energy storage facility (BESS), owned by Taaleri Energia 's SolarWind III fund and delivered by Merus Power, highlights the importance of flexibility and innovation in the Finnish power system. The BESS site was presented by the Technical Asset Manager of Taaleri Energia, Tuomas Kupila. The.

Battery systems supplier Nidec has chosen Destia to provide the infrastructure and electrical works for the battery energy storage system (BESS) that it is building for Neoen in Yllikkälä, Lappeenranta. Neoen is one of the world's leading independent producers of exclusively renewable energy. When.

Finnish Minerals Group and Beijing Easpring Material Technology have announced

the start of construction of a cathode active material (CAM) plant in Kotka, Finland. The announcement was made on Wednesday 20 March 2025, marking a major step in the development of Finland's battery value chain. The.
