

Guinea-Bissau switches to green electricity for solar sites

Overview

The World Bank has announced that it will support the development of Guinea-Bissau's first solar power plants. Like other West African countries, Bissau wants to use this solution to decarbonise its electricity production and accelerate the electrification of its.

The World Bank has announced that it will support the development of Guinea-Bissau's first solar power plants. Like other West African countries, Bissau wants to use this solution to decarbonise its electricity production and accelerate the electrification of its.

WASHINGTON, JUNE 6, 2024 - The World Bank's Board of Executive Directors approved a \$35 million grant to enable solar power generation and increase access to electricity in Guinea-Bissau. The Guinea-Bissau Solar Energy Scale-up and Access Project will work on the development of solar energy.

The World Bank, IDA, ESMAP, and GCF are backing Guinea-Bissau's first solar power plants with a \$78.15 million investment aimed at decarbonizing the country and expanding electricity access. The project involves building solar plants near Bissau and installing mini-grids on the Bijagós islands.

The World Bank has announced that it will support the development of Guinea-Bissau's first solar power plants. Like other West African countries, Bissau wants to use this solution to decarbonise its electricity production and accelerate the electrification of its population. Guinea-Bissau wants to.

The World Bank is supporting the development of Guinea-Bissau's first solar power plants, aiming to decarbonise electricity production and boost electrification. Under the Solar Energy and Access to Electricity Development Project, the World Bank will assist Guinea-Bissau until 2030 and has.

Our project focused on enhancing the energy efficiency of UNDP Guinea-Bissau operations through a comprehensive set of upgrades and behavioral changes. Building on previous efforts, it expanded the use of solar energy and introduced targeted measures to reduce electricity consumption and reliance.

The first photovoltaic solar power plants have been put into operation in Uinea-

Bissau. The World Bank has initiated development support plans whose objective is to decarbonize the country's electricity production and promote electrification. The project involves the construction of several solar.
