

High quality wholesale bess storage system Factory

Overview

What is a Bess system?

Customers rely on these systems to store excess energy produced during periods of low demand or when renewable energy sources, like solar and wind, are generating surplus power. Our grid-scale BESS solutions range from 1 MWh to over 1,000 MWh as both traditional LV and JST's unique HV cascade solution.

What are the benefits of a Bess system?

For commercial and industrial applications, our All-in-One BESS solutions offer optimal peak demand management, enhanced backup power and resilience and increased power quality and reliability. Customers can also achieve energy cost savings through time of use energy rates and off-peak management.

Why should you choose a modular Bess design?

Leveraging the JST suite of products and our advanced design and manufacturing capabilities, our modular BESS design features PCS units with robust stand-alone performance capabilities.
