The company specializes in a variety of starter batteries, including lead-acid and LiFePO4 technologies, and highlights the importance of maintaining battery charge during storage to extend lifespan. With over 50 years of R&D experience, their products are known for longevity and durability, making.

Over 15,000 households now use battery storage, a 200% increase since 2020. Government subsidies cover up to 40% of storage system costs until 2025. “Energy storage isn’t just backup power – it’s a gateway to energy independence for Croatian families.” – Renewable Energy Analyst Choosing the right.

The Croatian government has prepared 500 million euros to install batteries for storing energy produced from renewable sources. Minister of Economy and Sustainable Development Damir Habijan stated that Croatia is ready for energy changes. As he pointed out, we should take care of the green.

The European Bank for Reconstruction and Development (EBRD) is providing a direct equity investment of up to €16.8 million in IE-Energy Projekt, a newly established joint-stock company developing a greenfield battery energy storage system (BESS) and virtual power plant (VPP) in Šibenik, Croatia.

Croatia’s first battery energy storage facility connected to the national transmission grid is taking shape near Šibenik, marking a significant step in modernising the country’s energy infrastructure. The €60 million investment, co-financed by the European Bank for Reconstruction and Development.

In a significant stride towards energy modernisation, Croatia is setting aside EUR

500 million for the development of large-scale energy storage systems. The announcement was made by Damir Habijan, Croatia's Minister of Economy and Sustainable Development, at the seventh international energy.
