

# Kyiv Mobile Energy Storage Container 10MW

## Overview

---

Why is DTEK launching a battery storage facility in Ukraine?

REUTERS/Valentyn Ogirenko/File photo Purchase Licensing Rights KYIV, Sept 11 (Reuters) - Ukrainian private energy firm DTEK has launched the country's largest battery storage facility to ensure stable power supplies in the face of Russian attacks on Ukraine's energy sector, the company said on Thursday.

How many energy storage facilities does DTEK have?

DTEK has launched 200 MW of energy storage facilities in partnership with Fluence, a US-based global leader in energy storage. This was reported by DTEK's press service. The DTEK Group has connected six new energy storage facilities to the Ukrainian power grid, each with a capacity of 20 to 50 MW.

Will DTEK save Ukraine's power?

The DTEK project can store 400 MWh of electricity, which is enough to provide power to 600,000 Ukrainian homes for two hours. The investment will help reduce the risk of accidents and power outages, especially in the event of possible damage to maneuverable generation facilities due to shelling.
