

Long-term financing for solar-powered containers used in tunnels

Overview

Leverage Diverse Financing Options: Combine debt (e.g., green bonds, non-recourse loans), equity (e.g., institutional investors, tax equity), and government incentives (e.g., tax credits, grants) to optimize capital structure and reduce costs.

Leverage Diverse Financing Options: Combine debt (e.g., green bonds, non-recourse loans), equity (e.g., institutional investors, tax equity), and government incentives (e.g., tax credits, grants) to optimize capital structure and reduce costs.

Lenders are increasingly backing solar-storage projects with long-term contracted revenues, such as PPAs, a key factor, meanwhile Inflation Reduction Act provisions in the US have seen greater use made of tax credit transfer bridge loans – the Texas market, where there is high demand for.

Solar real estate investment fund SolaREIT announced it injected more than \$125 million in capital into the U.S. energy storage market. The company provided financing that supported over 1.6 GWac of energy storage projects since the company expanded into the battery storage market in the beginning.

However, there are a growing number of financing mechanisms that can be leveraged. When deployed strategically, these mechanisms can give organizations the financial tools to install projects that accomplish their energy goals. In 6 steps, this resource introduces organizations to a general process.
