The Mauritius government's 2025 budget signals a strong commitment to sustainable development, with a clear focus on renewable energy initiatives. This comprehensive plan is aimed at enhancing energy efficiency and reducing the nation's dependence on fossil fuels, positioning Mauritius as a leader.

- In order to meet the set target, the Central Electricity Board (CEB) has: (a) launched several renewable energy schemes covering a broad spectrum of the electricity market (b) signed contract agreements with seven renewable energy hybrid facilities comprising of solar and battery for a cumulative.

he deployment of solar (photovoltaics) PV systems under the Home Solar Project (HSP) scheme. The initiative is made possible through concessional funding from Abu Dhabi Fund for Development (ADFD), which has availed USD 10 million to the project under the IRENA/ADFD Projec auritius' commitment to.

Kindly note that the schemes are being updated.

Renewable Energy Roadmap 2030 was launched by the Ministry of Public Utilities in 2019 to the chart the way to achieve a target of 35% of renewable energy by 2025. It also includes energy scenarios to meet 40% of renewable energy by 2030. The renewable energy target in the energy mix was revised.

Mauritius is paving the way for a sustainable future through ambitious renewable energy goals, strategic investments, and innovative practices. With a strong commitment to reducing greenhouse gas emissions and transitioning to cleaner energy sources, the island nation is positioning itself as a.
