Overview

KISAE's newest release is the Bi-Directional series of Inverter Chargers. The BIC1220080 packs a 2000-Watt Inverter and a 80 Amp AC charger into 1 unit. It combines the charging hardware and the inverting hardware onto 1 PCB (mother board) inside the unit.

Features of Bidirectional Power Converters Bidirectional ac to dc converter, three level control technology, 98.5% efficiency . system and a power grid (and/or load) can control the charging and discharging process of the battery. For AC - DC conversion, it can directly supply AC load without.

The KISAE BIC1220080 2000 Watt Bi-Directional Pure Sine Wave Inverter/Charger is engineered to go all out. It offers dual purpose functionality across the board, delivering high wattage pure sine wave AC output and high amperage multi-stage charging from one circuit board. This results in a more.

The functioning of all types of inverters, including the bidirectional inverter is based on converting direct current (DC) to alternating current (AC). However, rechargeable energy storage systems (RESS) inverters serve a unique purpose. They facilitate the transfer of energy from an external DC.

What are some advantages of purchasing solar inverters in bulk?

The Bidirectional Inverter is classified under our comprehensive Solar Inverter range. Bulk purchases of solar inverters offer cost savings, competitive pricing, and customization options. Buying in bulk can streamline your supply chain. What is a bidirectional solar inverter?

A bidirectional solar inverter can additionally convert AC power to DC power for battery charging (if required). The inverter automatically detects availability of AC supply and changes operation mode from inverter to charger and charges the battery if solar power is not available.

How efficient is a bidirectional converter?

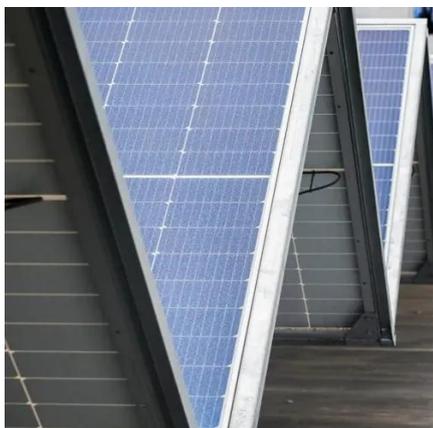

Converter efficiency is found to be 90%. To improve the drive performance with reduced cost, on-board chargers with a bidirectional converter was proposed in which the bidirectional converter acts as a rectifier during charging mode and as an inverter during inverter mode as shown in figure 5.

Who makes energy storage bi-directional inverters?

Newen Systems-India, in technological collaboration with Dynapower-USA, manufactures world class Energy Storage Bi-directional inverters with a production capacity of 2GW - Make in India. The energy storage solutions are custom engineered to specific needs of customers for "Front of the Meter" and "Behind the Meter" applications.
