The 40 foot shipping container is the largest and most cost-effective portable storage option available today. With over 320 square feet of floor space, it's big enough to hold the contents of a small warehouse, a contractor's entire staging area, or the seasonal inventory for a retail business.

While there's no one-size-fits-all answer since every project is unique, it's safe to ballpark an upfront investment between \$50K-\$85K for most standard 40-foot containers converted into farms. Remember though: this isn't just about cost it's about creating a sustainable future through efficient.

The Initial cost of a shipping container greenhouse typically ranges from \$10,000 to \$35,000. Shipping container farms are particularly advantageous in urban settings where space is limited. Building a shipping container greenhouse involves shipping, modifications for insulation and climate.

The energy storage system is essentially a straightforward plug-and-play system which consists of a lithium LiFePO4 battery pack, a lithium solar charge controller, and an inverter for the voltage requested. Price for 1MWH Storage Bank is \$774,800 each plus freight shipping from China. To discuss.

Range of MWh: we offer 20, 30 and 40-foot container sizes to provide an energy capacity range of 1.0 - 2.9 MWh per container to meet all levels of energy storage demands. Optimized price performance for every usage scenario: customized design to offer both competitive up-front cost and lowest.
