

Romanian monocrystalline silicon solar panels wholesale

Overview

What are monocrystalline silicon solar panels?

Monocrystalline silicon sun-energy panels are more widely used in solar rooftop systems. These panels are commonly preferred for large-scale solar PV installations. Such solar panels are used in different sectors such as industrial, commercial, or residential.

What is the difference between monocrystalline and polycrystalline panels?

Monocrystalline or mono panels are the most reliable and efficient type, polycrystalline or poly panels are slightly cheaper, but less productive. Thin-film panels or flexible panels are special in a way that they are very light and bend well. Monocrystalline panels are easy to distinguish by the black color of the cells.

Where to buy wholesale solar panels?

If you are looking for a place to buy wholesale solar panels, you've found it. A1 SolarStore offers PV modules from all over the world for competitive prices and with fast delivery. Let us tell you a little about the panels that we offer, how we deliver them and what kind of solar panel you might need.

Are REC Solar panels a good brand?

Norwegian brand REC is known primarily for its premium-class residential PV modules. However, it doesn't limit itself to this: the product line is wide enough that you can use wholesale REC solar panels for building a strong commercial system, small or large. REC products are known for high quality, great warranties and innovations.
