

# San Diego 5g base station company communications

## Overview

---

What is a 5G base station?

A 5G network base-station connects other wireless devices to a central hub. A look at 5G base-station architecture includes various equipment, such as a 5G base station power amplifier, which converts signals from RF antennas to BUU cabinets (baseband unit in wireless stations).

What is a 5G NTN connection?

The end-to-end 5G NTN connection, based on modelling constellations of Low Earth Orbit (LEO) satellites, was made in Qualcomm Technologies' San Diego laboratory by combining Keysight's 5G base station and aerospace emulation solutions with a Qualcomm Technologies 5G mobile test platform (MTP).

What are NTNS based on 5G satellite-to-ground communication?

NTNs based on 5G satellite-to-ground communication bring secure, reliable, and high bandwidth connectivity to remote areas that do not have terrestrial network coverage.
