Overview

What is a solar inverter?

PV and solar inverters are essential components of PV systems. They convert the direct current (DC) generated by PV modules into alternating current (AC). PV inverters by SMA are compatible with the inverter solar panels of nearly all leading manufacturers.

Which inverter solar panels are compatible with SMA?

PV inverters by SMA are compatible with the inverter solar panels of nearly all leading manufacturers. We offer the right device for each application: for all module types, for grid-connection and feeding into stand-alone grids, for small house systems and commercial systems in the Megawatt range. Do solar inverters convert DC to AC?

Solar inverters perform DC to AC conversion: Solar panels generate direct current (DC), which is electricity that flows in a single, constant direction. But homes, businesses and your local electrical grid operate on alternating current (AC), where the flow of electricity changes direction many times per second.
