Size of each solar panel on the roof

Size of each solar panel on the roof

In several C++ examples I see a use of the type size_t where I would have used a simple int. What's the difference, and why size_t should be better?

Size function in matlab

As you know, matlab deals mainly with matrices. So, the size function gives you the dimension of a matrix depending on how you use it. For example: 1. If you say size(A), it ...

javascript

The OP was asking 'Array.size () vs Array.length'. From the previous discussions, it was make clear, that the 'size' Function is not part of standard JavaScript but implemented ...

What's sizeof(size_t) on 32-bit vs the various 64-bit data models?

So, the size of size_t is not specified, only that it has to be an unsigned integer type. However, an interesting specification can be found in chapter 7.18.3 of the standard: limit of size_t ...

How can I see the size of a GitHub repository before cloning it?

Here's a hint: My absolute largest repository contains only images of various formats, it's an "artwork" repo of icons which I use in various apps. Yet, GitHub reports the size as 0. So I'm ...

[What does the C++ standard say about the size of int, long?](#)

If the size of the int is that important one can use int16_t, int32_t and int64_t (need the iostream include for that if I remember correctly). What's nice about this that int64_t should not have ...

c++

typedef size_t intc; // (instead of unsigned int) typedef ssize_t uintc; // (instead of int) Because strlen, string, vector all use size_t, so I usually use size_t. And I only use ssize_t when it may ...

int

ASIMER SOLAR - Professional Energy Solutions

In this case, depending upon what your use case is, you might be better off using int (or long long) for s1 and s2. There are some functions in C/POSIX that could/should use size_t, but don't ...

How to determine the size of an object in Java

The approach basically builds on other work where people experimentally identified the size of primitives and typical Java objects and then apply that knowledge to a ...

Difference between size and length methods?

What is the difference between .size() and .length ? Is .size() only for arraylists and .length only for arrays?
