The average U.S. homeowner spends \$2,000 on a solar inverter, but costs range from \$1,000 to \$3,000 depending on the model and the number of inverters. A solar inverter makes up about 10% of the total cost of your solar energy system. Expect to spend \$0.15 to \$0.24 per watt on a solar inverter, not.

Micro-inverters also allow you to start with a small-scale system that matches your budget, then expand down the road. If you want to start with a single solar panel, that's completely doable with micro-inverters. You'll start saving money

immediately, since solar is cheaper than buying power from.
