

Solar and wind power panels

Overview

A wind turbine and solar panel combination helps you get the best performance from your setup. Our hybrid systems are designed to avoid the common pitfalls that can cause wind- or solar-only systems to come up short. After all, the sun can't always shine and the wind can't always blow.

Why do solar and wind work well together?

Renewable energy resources are an easy, cost-effective way to reduce both electricity costs and carbon emissions. However, a common criticism leveled at renewable energy resources like wind and solar is: what happens when the wind isn't blowing and the sun.
