

Solar container outdoor power Sydney Australia

Overview

What is a solar container build?

It's a modified shipping container built to house solar panels, batteries, inverters, and other off-grid power systems. These units are ideal for powering remote sites, construction camps, emergency setups, or as a portable backup energy system. What's included in a solar container build?

.

What is a solar powered shipping container?

At SCS Australia, we create solar powered shipping containers that combine renewable energy technology with the strength and mobility of a shipping container. These self-sufficient units are ideal for powering off-grid operations, mobile businesses, events, and remote projects—all while reducing carbon footprint and cutting energy costs.

What is a containerised mobile solar power generator?

It is the first containerised mobile solar power generator that is specially designed for fixed deployment. This system is suitable for both on-grid and off-grid use, and can be redeployed in less than 24 hours without the need for specialist labour.

Are solar containers safe?

Yes — all solar containers are built from weatherproof, lockable shipping containers. Your gear is safe from the elements and secure from unauthorised access. Can the system be expanded later on?
