In short, you can indeed run power to a container – either by extending a line from the grid or by turning the container itself into a mini power station using solar panels. Why power a shipping container?

There are many reasons to supply electricity to a container, especially in off-grid settings.

Upgrade your shipping container home or office with a solar power kit and make the transition to off the grid living effortless! This system is designed to easily connect all your essential appliances (air-conditioners, computers, lights, microwaves and more). It's equipped with a 3000 watt power.

Stealth Power provides fleet electrification and off grid solar solutions for customers of all kinds. They have explored and implemented solar options for a wide variety of applications and we have found their solar options for shipping containers to be the best in the business. Many customers.

The Off Grid Container also transports the solar PV panels and mountings, the only part of the product which has to be assembled at the customer's site. The on-site installation is undertaken by the Off-Grid Installer team and after all clients are included in the online remote monitoring service.

RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize the Barebones and Move-In Ready options to any design.
