

Solar glass project in Barcelona Spain

Overview

Does Mes Barcelona install photovoltaic panels?

MES Barcelona also installs photovoltaic panels for residents' associations. The funders of the photovoltaic installation sell the energy to the building's owners, and at the end of the energy sale contract, ownership of the panels is transferred to the building owners at zero cost.

Is solar power a good investment in Spain?

Since he took power in 2018, energy developers have built solar parks, proved that power generation had attractive returns and pulled in capital from yield-hungry investors. In 2023 and 2024, Spain added more solar power capacity than any other European country except Germany, whose economy is more than twice its size.

Are Spain's solar uplands overheating?

But the sunlit uplands of solar have begun to overheat. Spain has built so much solar capacity that at certain times of day it produces far more electricity than it needs. Prices have plunged as a result, dragging down owners' profits with them.

Can a solar plant be built in the countryside?

"Setting up a solar plant is ultimately like building a factory in the countryside," says Miguel de la Rosa, an engineering chief for project owner Zelestra, as cable reels and crates of electrical gear imported from China sit in the dirt, ready for connection to the power grid early next year.
