

# Solar inner glass

## Solar inner glass

### [Is Solar Control Glass Worth It? An In-depth Analysis](#)

Solar control glass is designed to reduce overheating in homes and buildings due to solar gain. By reflecting infrared radiation and ...

### Solar Control Glass

In hot climates, solar control glass can be used to minimise solar heat gain and help control glare. In temperate regions, it can be used to balance solar control with high levels of natural light.

### [Solar Control Interlayer for Automotive Laminated Glass](#)

By combining various solutions, S-LEC(TM) Solar Control Film can be applied not only to an IR glass windshield but to all automotive glass, such as side windows, roof glazing, and rear ...

...

By combining various solutions, S-LEC(TM) Solar Control Film can be applied not only to an IR glass windshield but to all automotive glass, such as ...

### 8 Major Benefits of Solar Control Glass

What Is Solar Control Glass? How Does Solar Control Glass Work? Benefits and Advantages of Solar Control Glass  
Solar control glasses, also known as solar or reflective glass, are designed to reduce the heat entering the interiors. An internal portion of the external glass unit is coated with a special metal oxide solution to reflect and absorb the outdoor heat and filter the UV rays to ensure minimum glare. In short, whenever sunlight hits the reflective gl See more on in.saint-gobain-glass
