

Solar modules in the Netherlands

Overview

There are three main types of solar panels you can get in the Netherlands: monocrystalline panels, polycrystalline panels, and thin film panels. Monocrystalline panels are made using silicon and have an aluminium frame.

There are three main types of solar panels you can get in the Netherlands: monocrystalline panels, polycrystalline panels, and thin film panels. Monocrystalline panels are made using silicon and have an aluminium frame.

Solar power in the Netherlands has an installed capacity of around 23,904 megawatt (MW) of photovoltaics as of the end of 2023. Around 4,304 MW of new capacity was installed during 2023. [1] Market research firm GlobalData projects Dutch solar PV capacity could rise to 55,000 MW (55 GW) by 2035.

Inderdaad, solar panels have become relatively affordable and widely accessible, not to mention the wonders they'll do for your bank account and the environment! Here's what you should know about installing and owning solar panels in the Netherlands. Know what you want?
