

# Solar power generation and energy storage in Benin

## Overview

---

At present, Benin's domestic power generation capacity comes principally from thermal sources (69%) — which includes natural gas, coal and oil — with hydroelectricity (16%) and solar energy (15%) making up the rest. However, the country is overwhelmingly reliant on imported.

At present, Benin's domestic power generation capacity comes principally from thermal sources (69%) — which includes natural gas, coal and oil — with hydroelectricity (16%) and solar energy (15%) making up the rest. However, the country is overwhelmingly reliant on imported.

Benin's government has reaffirmed its intention to make renewable energy the main source of the country's power supply by 2030. Access to electricity in Benin remains both low and highly uneven: Around 42% of urban households are connected, with less than 13% in rural areas. With financial and.

Benin is taking significant strides in renewable energy, with plans to install 150 MW of solar power capacity by 2026. This ambitious goal is part of the government's broader agenda to diversify the country's energy mix and reduce its reliance on imported fossil fuels. The proposed solar expansion.

Energy in Benin has a diverse energy mix and takes several forms including: solar, wind, hydropower, biomass, fossil resources, and mineral resources. Out of this energy mix, about 60% of energy comes from biomass. Benin is also dependent on energy imports from Ghana and Côte d'Ivoire. Are wood.

Non-renewable (TJ) 97 098 87 601 Renewable (TJ) 109 668 127 845 Total (TJ) 206 766 215 445 Renewable share (%) 53 59 Growth in TES 2017-22 2021-22 Non-renewable (%) -9.8 +6.0 Renewable (%) +16.6 +2.7 Total (%) +4.2 +4.0 Primary energy trade 2017 2022 Imports (TJ) 96 978 88 257 Exports (TJ) 0 837.

Construction launched on 12 November at the 25MWp Forsun Solar PV plant in Pobè, Benin. The project is the result of cooperation between the French Development Agency (AFD), the European Union and the Beninese government to invest almost 16 billion West African Francs (\$25.58 million) into building.

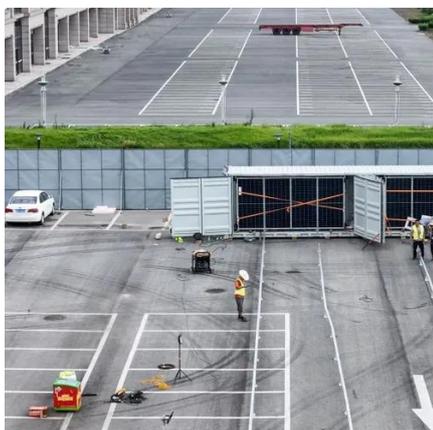

## Solar power generation and energy storage in Benin

### Benin's 2025 Energy Storage Revolution: Powering West Africa's

Here's the problem everyone's talking about: Benin currently imports 80% of its electricity from neighbors. While solar potential exceeds 5.5 kWh/m<sup>2</sup>/day, the national grid can't handle ...

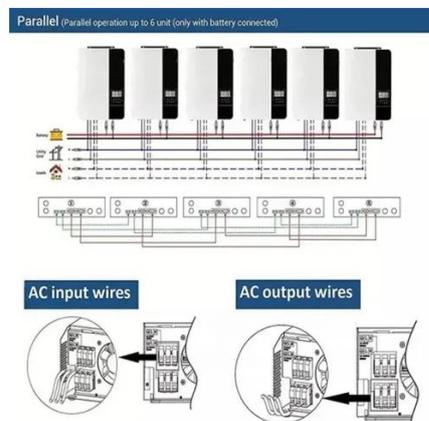

### [Benin Solar Power: Targeting 150 MW Expansion by 2026](#)

The expansion of solar power in Benin is poised to transform the country's energy sector. Increasing the share of renewables in the national energy mix will allow Benin to ...

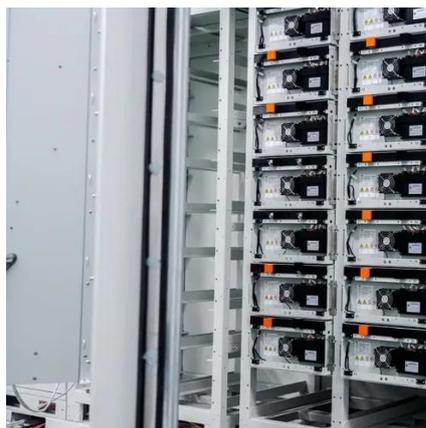

### Renewable energy in Benin: current situation and future prospects

Benin is one of the least-developed countries in West Africa, struggling to satisfy the energy needs of its 12.2 million inhabitants [11]. With a total surface area of 114 763 km<sup>2</sup>, ...

### [Benin puts solar power at the heart of its energy policy](#)

The government of Benin is focusing on building solar power plants as part of a policy to make renewable energy the main source of the country's energy supply by 2030.

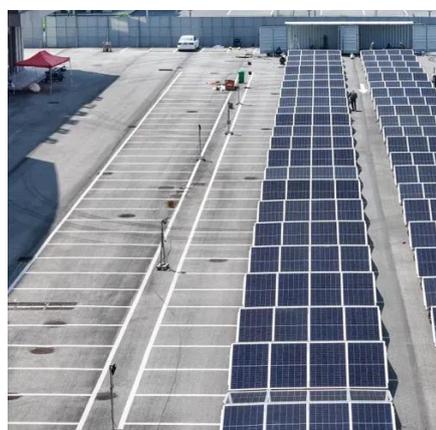

### Benin field energy storage

As more renewable energy sources like solar and wind are integrated into the electric grid, energy storage will be essential for managing fluctuations in power generation.
