

# South African Magnesium Energy Storage Project

## Overview

---

The projects, developed in collaboration with EDF International and partners such as Mulilo, Gibb-Crede, Pele Green Energy, and a community trust, will be strategically located in South Africa's Northern Cape Province.

rowth in energy storage demand. The rise in demand will come from the transformation of the energy system to include more renewables and developing demand in the momentum of the Oasis projects. These developments signify a vital step in aligning private-sector innovation with national energy.

South Africa has reached a major milestone in its renewable energy transition, as three cutting-edge Battery Energy Storage System (BESS) projects, collectively known as Oasis, progress toward implementation. These projects are part of the nation's inaugural Battery Energy Storage Independent Power.

Envision is the first energy storage system supplier in the region to secure a GWh-scale order. The initiative will significantly enhance South Africa's power infrastructure, alleviating grid congestion and increasing renewable energy integration. Credit: The Desert Photo/Shutterstock. Envision.

Scatec ASA, a Norwegian frontrunner in renewable energy, is moving forward with its Mogobe Battery Energy Storage System (BESS) project in South Africa. The company has recently completed the financial arrangements necessary to begin construction of the 103MW/412MWh facility, a pivotal development.

The three Oasis 1 battery energy storage systems (BESS) projects, led by EDF group in collaboration with Mulilo, Pele Green Energy and Gibb Crede, reached financial close in November 2024. Awarded in the first round of South Africa's Battery Energy Storage Independent Power Producer Procurement.

A consortium including Copenhagen Infrastructure Partners (CIP) and utility EDF has won preferred bidder status for three battery energy storage system (BESS) projects in South Africa. The consortium was awarded the three BESS projects

totalling 257MW/1,028MWh of energy storage by South Africa's.
