

# String type 100kw inverter 380

## Overview

---

What is a CPS 100kW inverter?

High efficiencies, wide operating voltages, broad temperature ranges and a NEMA Type 4X enclosure enable this inverter platform to operate at high performance across many applications. This CPS 100kW inverter ships with the Standard Wire-box.

Does inverter & wire box ship separately?

Note: Inverter and wire-box often ships separate. Ships via freight direct from manufacturer. The 100kW high power CPS three phase string inverters are designed for ground mount applications with 480Vac service voltage. The units are high performance, advanced and reliable inverters designed specifically for the North American environment and grid.

How many strings can a CPS flexom inverter handle?

The Standard Wire-box includes touch safe fusing for up to 20 strings. The CPS FlexOM Gateway enables communication, controls and remote product upgrades. The 100kW high power CPS three phase string inverters are designed for ground mount applications with 480Vac service voltage.

Are CSI inverters a good choice?

CSI inverters are easy to configure and have a high conversion efficiency of 98.5% to provide high yield and significant BoS savings. With a wide operating range of 200-1000 Vdc and 6 or 9 MPPTs, they are the ideal choice for maximum energy harvesting. For detail information, please refer to Installation Manual.
