

Studio Uninterruptible Power Supply

Overview

What is an uninterruptible power supply?

Read more about our editorial standards. An uninterruptible power supply, or UPS, is basically a surge protector, battery, and power inverter — which turns the battery's stored energy into usable power — in one.

Are uninterruptible power supplies necessary in audio recording/mixing/mastering studios?

Uninterruptible power supplies aren't necessarily essential in audio recording/mixing/mastering studios.

Do you need a power ups for a studio?

However, in the cases where power is applied to the studio equipment (primarily the computer), they will afford the professional (and amateur) time to save projects and power down equipment properly to avoid lost data and damage to expensive equipment. A UPS can be purchased at any step of building a studio.

How powerful is a ups?

It's powerful. In our testing, this UPS produced a peak power output of 470 W, which is lower than what we saw with most of the units we tested, but should still be enough to power a desktop computer, a household modem, a Wi-Fi router, an external hard drive, and maybe a few small devices.
