

# Swiss home solar container energy storage system production

## Overview

---

Trade body Swissolar has called for a national energy storage strategy to support the rising popularity of home solar-plus-battery systems in the country. In Switzerland, roughly every second residential photovoltaic system is installed together with a battery.

Trade body Swissolar has called for a national energy storage strategy to support the rising popularity of home solar-plus-battery systems in the country. In Switzerland, roughly every second residential photovoltaic system is installed together with a battery energy storage system (BESS). “Over.

Switzerland’s home solar energy storage market is growing rapidly, driven by federal incentives, regional subsidies, and a strong national commitment to sustainability. As electricity prices rise and the nation shifts toward renewable energy, more homeowners are choosing to invest in solar.

Integrating electricity and heat storage into a storage solution increases the reliability of the energy supply. Storage systems also play a key role in decarbonising Switzerland’s energy supply. The ewz white paper ‘Energy storage systems for properties’ provides investors and property owners with.

The industry association Swissolar expects a moderate decline in new photovoltaic capacity this year, to 1.6 GW, compared with 1.8 gigawatts added in 2024. From 2026 onward, the market is expected to stabilize. This makes the sector attractive both in the short and long term – a fact underscored.

In Kappel, in the canton of Solothurn, one of the largest battery storage systems in Switzerland is currently under construction, with a total capacity of 65 megawatt-hours. The successful delivery of all system components marks a key milestone on the path to commissioning. Primeo Energie will use.

Energy storage is rapidly become more and more relevant due to the increasing

renewable energy fraction in the grid, the rise of photovoltaics and the increase in electric cars. This website aims to give an overview of the energy storage situation in Switzerland. It was created as part of an BFE.

## Swiss home solar container energy storage system production

### [Demand for home solar energy storage rising in...](#)

Trade body Swissolar has called for a national energy storage strategy to support the rising popularity of home solar-plus-battery ...
