

The Netherlands applies for EMS for base station room

Overview

The Dutch system is a rare exception to the rule in Europe, in that it operates on a variation of the Anglo-American model of EMS care, and not on the Franco-German model, followed by the majority of European countries.

What is the emergency number for EMS in the Netherlands?

All EMS dispatch centers participate in the national emergency number scheme. The emergency telephone number for ambulances in the Netherlands is 112. All EMS calls in the Netherlands are nurse-triaged. Triage is conducted using national evidence-based triage protocols and guidelines developed by the Dutch Ambulance Institute.

Does Holland have emergency air ambulance service?

Some areas of Holland also receive emergency air ambulance service from helicopters or vehicles based in Belgium and Germany, since these locations are beyond the normal flight range of the Dutch-owned aircraft. Since 1992, Dutch law has mandated at least one nurse on every ambulance in the country, at all times.

How does the Dutch emergency healthcare system work?

For this, it is good to know that the Dutch emergency healthcare system is well-organized, with clear distinctions between levels of care. In life-threatening situations, the emergency number 112 is your first point of contact. It connects you to ambulance services, as well as the fire department and police, if necessary.
