Eaton is a leading provider of back-up power UPS, or uninterruptible power systems. Eaton UPSs deliver high quality, reliable back-up power for everything, from network closets and server rooms to enterprise and co-location data centres. Need a primer on UPSs?

Eaton's UPS fundamentals handbook.

An uninterruptible power supply (UPS), is an easy-to-install device designed to provide backup power to computers, servers, server rooms and data centres in the event of a main energy failure, electrical surge or unexpected power cut. A UPS contains a battery that supplies power for a limited time.

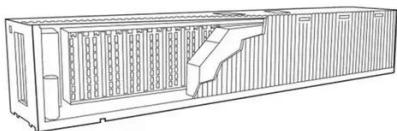

A UPS protects mission-critical hardware like computers, servers, and telecommunication equipment from unexpected power disruptions that could cause injuries, fatalities, business disruption, or data loss. It's essential in IT, telecom, commercial, and industrial applications where power continuity.
