Find uninterruptible power supplies.

What is a UPS?

An uninterruptible power supply (UPS) is a type of backup battery that will continue to provide electrical power to the electronics that you have plugged into it even if electricity from your home outlets cuts out. Unlike a backup generator, it does not need to power up in order to.

A power outage can be anything from an inconvenience to an existential threat - and wherever your application falls on that scale, an uninterruptible power supply, or UPS, can help. A UPS provides an always on power source that will help keep your most important data and sensitive electronics safe.

Uninterruptible Power Supply (UPS) systems provide power to computer networks in the event of a power shortage or electrical outage so computers and other sensitive electronic equipment can be turned off properly. UPS system batteries

keep systems running and help prevent data loss in the event of.
