

# West Africa shuts down communication green base station service

## Overview

---

On 14th March 2024, the West and South Western coasts of Africa experienced a critical disruption in internet connectivity due to damage to several key subsea cables, including the Africa Coast to Europe (ACE), MainOne, and the West Africa Cable System (WACS).

On 14th March 2024, the West and South Western coasts of Africa experienced a critical disruption in internet connectivity due to damage to several key subsea cables, including the Africa Coast to Europe (ACE), MainOne, and the West Africa Cable System (WACS).

The suspension of seven private radio stations by Ghana's Minister for Communication, Digital Technology, and Innovations raises once more the thorny issue of possible compromise of fairness and transparency and the danger this poses to press freedom and access to information. "Today, in two.

The National Communications Authority (NCA), on Thursday, June 12, 2025, shut down 62 FM broadcasting stations across the country, including Wontumi FM and Asaase Radio, for failing to comply with broadcasting regulations. The statement by the NCA indicated that out of the 62 media houses that were.

The GSMA is a global organisation unifying the mobile ecosystem to discover, develop and deliver innovation foundational to positive business environments and societal change. Our vision is to unlock the full power of connectivity so that people, industry and society thrive. Representing mobile.

As West Africa enters a defining decade for digital development, the expansion of telecommunications infrastructure is becoming one of the region's most visible—and transformative—signs of progress. Mobile networks are extending into previously unconnected regions. Fibre-optic backbones are.

Minister for Communication Sam George has directed the National Communications Authority to shut down seven radio station frequencies. Six of these stations were operating without valid frequency authorisations, while one other was closed on security grounds. Minister for Communication Sam George.

The Nigerian Communications Commission (NCC) has confirmed that the voice and

data services affected by undersea cable cuts have been restored. A statement issued on Monday by the Director of Public Affairs at NCC, Reuben Muoka, revealed that services have now been reinstated to approximately 90%.
